

ABOVE AND BEYOND

Tier 1 Security Program & Leaders

How do I clarify and define the foundation of my program, which grew organically? My security program lacks respect and value in the organization. Are my programs/services, brand image and communications resonating with senior management?

*The SEC's Tier 1 Security Leader level of research and knowledge is like bringing a **Center of Excellence resource** into your department to advance your programs and team to its **highest level of capability**.*

Tier 1 status provides you:

- The most up-to-date proven practices and research from the most accomplished security leaders.
- Insight into key performance indicators from the best security programs from all industries.
- Access to leading security strategists who have previously navigated many of your organizational challenges.
- Resources, tools and templates to effectively influence your executives.

Transformation

Tier 1 was created in response to executive management that wanted more than gates, guns and guards. It is highly valued by security leaders who are driven to change this common misconception. Our leaders understand there is no "magic bullet." Innovation requires effort and collaboration. But in the end, a leading and valued security organization emerges.

The Security Executive Council (SEC) is the only research and advisory firm that specializes in corporate security and is comprised of former security executives. We understand the issues and work to solve obstacles to program and leadership success.
